

Enclosures and Systems

We design and build small and medium sized electrical process control systems. If you are looking for a single source to provide a turn key solution, we can help you. We can design, build and deliver most small systems in just a few weeks from inception to delivery. You can supply the instruments or we can supply them for you. **Please give us a call to discuss your requirements.**

- **Single source responsibility**
- **Extremely fast delivery**

- **An industry leader since 1968**
- **All fabrication and wiring done in house**
- **If you need it yesterday, call us today**
